Registration: https://attendee.gotowebinar.com/register/2539823883437536525

After registering, you will receive a confirmation email containing information about joining the webinar.

The Asia LEDS Partnership (ALP) Secretariat, hosted by ICLEI South Asia (ICLEI SA), is implementing a project ‘Asia LEDS Partnership with support from the Swiss Agency for Development and Cooperation (SDC). As a part of project activity, ALP shares and imparts knowledge on Clean Mobility with our member countries through online sessions. The target audience of these sessions are representatives from national and sub national governments, technical institutions, transport experts etc.

ALP is organizing the webinar on the topic, ‘Roadmap for Sustainable Green Freight’ with an objective to sensitize the participants about the emissions caused by non-passenger activities which are often ignored. The webinar session is designed to assist the participants in understanding the importance of green freight as a priority sector for city and national governments. These actions will help the governments to target achieving NDC commitments, developing institutional capacity, developing and understanding freight emission assessment tools etc.

Speakers:
- Dr. Tsu-Jui Cheng, Ph.D, Program Manager and Global Coordinator, Sustainable Mobility / EcoMobility Initiative, ICLEI World Secretariat
- Dr. Zhi Fang Yin, Research Institute of Scientific Research, Ministry of Transport of China
